ASHP2

Premium Polishing Pad

APPLICATION SNAPSHOT

General Tool, a leader in the design and manufacture of diamond tools, is introducing a new premium wet polishing pad for natural and engineered stone.

The new pads were tested against two premium competitive pads on both white granite and black granite using a Makita PW5001C grinder turning at 3500rpm. The working time was 40 seconds for each grit size. The results were measured with a gloss meter after the final 3000 grit pad was used.
