

DIAMOND BLADES

ZENESIS™ ZSG BLACK 4

Bridge Saw Blade

APPLICATION SNAPSHOT

Granite

Engineered Stone

Quartzite

ZENESISISTM patterned technology delivers consistency in diamond exposure, providing

maximum efficiency start to finish. With feed rates exceeding 15 ft./min. this blade

CONFIGURATIONS & TECHNICAL DETAILS

outperforms random diamond bridge saw blades by 30 – 70%. Hybrid diamond layering	guarantees that diamonds will always be evenly exposed on all sides of the segment. This
further increases cutting speed and debris removal. Diamond clusters provide more	diamond point exposure, which increases cutting speed with less amp draw and therefore is
easier on machinery. ZENESISISTM products are manufactured utilizing the highest standards	of manufacturing in ISO certified facilities. This delivers consistent results blade after blade
and batch after batch.	The ZENESISISTM BLACK 4 was designed to be the longest lasting blade in the stone industry.
Extensive testing showed it consistently lasting at least 10% longer than all other name	brand blades.
Designed to outlast all other bridge saw blades on straight or mitered cuts.	Cuts Granite, Engineered Stone, and Quartzite
Wet use only	Part No. Diameter Segment Arbor size

MATCH IT TO THE JOB

For the right bond and configuration, have the saw, material, aggregate hardness, cut depth, wet/dry requirement, and daily production target ready.
